

Quantitative Analysis – CHEM 201 Fall 2007

Instructors

Lecture:

Dr. Xin Wen, PS 620	Office hours:	M,W 5:00 – 6:30 p.m.
phone (323) 343-2310		T 1:15 – 2:15 p.m.
email: xwen3@calstatela.edu		

Laboratory:

Dr. Pavel Glukhovskiy, PS 610	Office hours: TR 11 am- 12:20 pm
phone: (323) 343-2313	
email: p.glukhovskiy@att.net & pglukho@calstatela.edu	
Dr. Gregorio Santillan, PS 610	Office hours: MWF 10-11 am & TR 12-1pm
phone: (323) 343-2313	
email: gsantil@calstatela.edu	
Dr. Errol Mathias, PS 627	Office hours: T 2:10-3:30 pm
phone: (323) 343-2321	
email: emathia@exchange.calstatela.edu	

Lecture T,Th: 11:40 a.m. – 1:00 p.m., SH-C162

Laboratory Section 02: T,Th 8:00 – 10:50 a.m., P.S. 824 (Dr. Glukhovskiy)
Section 03: T,Th 1:10 – 4:00 p.m., P.S. 824 (Dr. Glukhovskiy)
Section 04: T,Th 6:30 – 9:00 p.m., P.S. 824 (Dr. Mathias)
Section 05: M,W 1:10 – 4:00 p.m., P.S. 824 (Dr. Santillan)

Course Description

CHEM 201 is a sophomore level course which introduces students to principles and techniques in proper quantitative chemical analysis. The formal prerequisite is a full year of General Chemistry (CHEM 101-103 or equivalent from another university with a grade of C or better). It is assumed that students have a solid grasp of college level math including algebra.

Course Objectives

The main objective of CHEM 201 is to develop students' understanding of the principles of analytical chemistry. More detailed objectives include:

- To learn both classical and modern instrumental aspects of analytical chemistry;
- To learn the analytical process as applied to basic laboratory research;
- To become familiar and later master the elements of good laboratory practice;
- To ultimately apply his/her knowledge of analytical chemistry in an independent manner.

Required Textbook

Quantitative Chemical Analysis, 7th Edition, D.C. Harris, W.H. Freeman and Company, New York, 2007, <http://bcs.whfreeman.com/qca/>

Lab Handouts

Detailed handouts of each of seven laboratories and safety requirements will be provided by the instructor. The laboratory protocols will be available on the Chemistry Department's website: www.calstatela.edu/dept/chem

Learning Video

The video tape, "Chemistry" – has six sections and the Safety section and Pipetting section will be shown at the first laboratory meeting. Demonstration of the analytical balance will also be given.

Lecture presentation style

Lectures will be mainly presented using PowerPoint format. Chalk talk will be given when needed. A pdf version of each chapter's lectures will be posted following completion of the chapter on the **Class Notes** page on the Chemistry Department's website: www.calstatela.edu/dept/chem

Tentative Lecture Schedule

Week	Dates	Subject	Chapters
0	Sep 20	Analytical Processes/Basic Review of Concepts Solutions and their Concentrations; Stoichiometry	0, 1, 2
1	Sep 25 Sep 27	Gravimetric Methods of Analysis Experimental Error and Calibration Methods	27 3, 4, 5
2	Oct 2 Oct 4	Chemical Equilibrium Acid-base Equilibria	6, 8 9
3	Oct 9 Oct 11	Acid-base Equilibria (cont.) Mid-term Exam #1	9
4	Oct 16 Oct 18	Acid-base Equilibria Acid-base Titrations	10 7, 11
5	Oct 23, Oct 25	Complex Formation and Redox Titrations	12, 16
6	Oct 30, Nov 1	Spectrophotometry	18, 19, 20.1- 20.4, 21
7	Nov 6 Nov 8	Mid-term Exam #2 Electrochemistry & Potentiometry	14, 15
8	Nov 13, Nov 15	Analytical Separations; Gas Chromatography	23, 24
9	Nov 20, Nov 27	HPLC; Chromatographic Methods	25, 26
10	Nov 29 Dec 4	Review Final Exam, 10:45 a.m.	

Attendance all lecture classes is expected. Unannounced quizzes and group work are to be anticipated by all students. Absent students are responsible for all discussion and lectures they missed.

No makeup exams are given for the Mid-term Exams. At the discretion of the instructor in cases of documented family emergencies and illness (with doctors excuse) only, a student may be excused. Under no circumstances will a student be excused from taking the test due to lack of preparation

Homework

Homework problems will be assigned at the beginning of each week and will be handed in at the **first laboratory period the following week** unless otherwise stated. Late homework: First lab 2 points deducted, thereafter 1 point deducted for each additional lab period. Homework should be neat and state the Homework # and the problems assigned at the top of the first page. Students should work these problems independently with all calculations clearly visible in a step by step manner on stapled paper.

HW Set	Due date	Chapter	Problems
--------	----------	---------	----------

1	Sept 27	1 (p. 18) 2 (p. 37) 27 (p. 641)	14, 15, 17, 18, 19, 20, 21, 31, 33, 34 1, 4, 14, 15, 18 15, 17, 18, 22
2	Oct 4	3 (p. 51) 4 (p. 75) 5 (p. 92)	7 (a, c, d, f, g), 15, 21 13, 14, 19 2, 23
3	Oct 9	6 (p. 117) 8 (p. 155) 9 (p. 178)	6, 20, 40, 50 3, 12, 17, 20 4, 13, 33, 37
4	Oct 23	10 (p. 196) 7 (p.137) 11 (p. 223)	1, 5, 13, 28 7, 14, 20 8, 12, 18, 31
5	Oct 30	12 (p. 246) 16 (p. 344)	2, 7 (a,c,f,i), 32 3, 14, 18, 25
6	Nov 6	18 (p. 399) 19 (p. 418) 21 (p. 472)	6, 10, 12, 16 1, 3 5, 14, 19, 20
7	Nov 13	14 (p. 294) 15 (p. 323)	16, 21, 25 2, 3
8	Nov 29	23 (p. 525) 24 (p. 553) 25 (p. 585) 26 (p. 624)	9, 11, 13, 18 20 13 10

Laboratory work

Items required include: A scientific calculator, approved safety goggles, bound notebooks (quad-ruled composition book, bookstore). Students must inform their instructors in advance if a laboratory will be missed. Failure to do so may result in the student being dropped from the class. All laboratory work for this class must be performed in the quantitative analysis lab, not individual research labs. No switching laboratory sections unless approved by both instructors. If you must receive a new unknown sample, 5 points will be deducted from your lab score. All unknown laboratory work will be graded based on overall precision and accuracy. If you do bring safety goggles to lab, 5 points will be deducted for incident.

Quizzes

A written quiz will be given in the laboratory on the day that you are scheduled to start each unknown experiment. Quizzes will cover laboratory work assigned for the particular experiment to be completed. Typically, the quizzes test your knowledge of the chemistry involved as well as your ability to do quantitative analysis based on data given.

Flow Charts

A work outline (flow chart) with estimated times for each step in each experiment is required at the beginning of each lab and must be written in the left side of notebook before each new experiment (see notebook format below). Before getting an unknown sample, students will be given an oral quiz on the information which should be in the outline.

Laboratory Notebook Format (no spiral notebooks will be accepted)

Record all experimental work in a stiff-covered, permanently bound notebook (National, # 53-110) and use the right hand pages of the notebook for the experimental records. Flow chart must be

placed on left hand pages. The first two pages of the notebook are to be saved for Table of Contents. Pages must be numbered. All data must be written directly into the notebook with a date on every data page. No pencils, "white-out", or erasable ink may be used. If an error is made, simply place a single horizontal line through mistake and enter correction. Be sure to write down important procedures in lab book before each lab. No photocopies of manual or procedures in lab book. Always have your notebook in class for spot inspection or grading. **Note: Up to 5 points will be deducted for each violation of the above policies!**

Each experiment record and report must include the following:

1. Name, section #, date, quarter
2. Experiment title, and objective(s)
3. Principles: a concise description of the chemical principles (equations included).
4. Data and important observations (IN INK)
5. Calculation methods: at least sample calculations of all calculations must be included.
6. Results and discussion (graphs included)

Note: Points will be deducted for any missing information!

Note: Any balanced equations or mathematical expressions are to be put in the "Principles" section. The penalty for not having a lab book is **10** points. Outside of book must be labeled with name (printed), Chem 201, Lab section #, time of meeting, locker #, instructors name and quarter taken. Lab books will be graded twice during the quarter (unannounced).

Informal Reports

Results of every unknown are to be handed in on the tear-out sheet in back of your experimental handouts at the beginning of the first period following the scheduled completion of experiments. 2 points will be deducted for late reports on the first lab period after the due date and 1 point will be deducted for each additional lab period. Reports must include averages, standard deviations and relevant graphs (Excel or other graphing programs). Informal reports should be handed in before the formal report to access unknown grades. Be sure to include all data for each determination along with calculations and experimental set-up and label all graphs appropriately.

Formal Reports (**see last page for detailed descriptions of sections)

Three (3) formal, typed-written reports will be handed in during the course (experiments included will be announced by lab instructor). These reports must follow the format below. These reports will be due the lab period following submission of the informal report for that same experiment. As with homework, 2 points will be deducted for late reports on the first lab period after the due date and 1 point for each additional lab period. Reports must be a concise description of the experiment with all appropriate data and graphs. **Formal reports will be required for the calcium (Ca) and acid-base (pH) titration experiments as well as the research project.**

The format includes (in order):

1. Cover page with title of experiment, name, date, locker # and lab section
2. Abstract
3. Introduction
4. Experimental procedures
5. Results, including data and relevant graphs
6. Conclusion
7. References
8. Acknowledgments

Research project

Students have a choice of research projects based on the instructor's overall choice of topics. However, projects must be within the constraints of the laboratory equipment and chemicals in the laboratory. Students should give the instructor a short procedure with list of equipment and chemicals for approval (by the end of the 6th week). Topics deemed appropriate will be discussed in lecture and a handout will be provided during the 6th week.

Laboratory safety

The safety film you will watch on the first day of your laboratory section is vital and your attention is required. In addition, your lab instructor will show you where important safety items are located, *i.e.*, eye wash, safety shower.

Some important points to keep in mind:

1. Safety glasses must be worn at all times in the lab
2. No food or drinks in the lab
3. No shorts or open toed shoes allowed
4. Work with concentrated acids and bases in the appropriate hoods
5. Report any accidents to laboratory instructor or assistant
6. Be aware of all safety demonstrations in video
7. Be aware of all exits and safety equipment including eye wash and fire extinguisher.

Laboratory etiquette

It is essential that you consider others in the lab. Be careful with acids and hot reagents and clean up any spills that may occur. Use of the analytical balances: do not use weighing paper and never transfer samples in the analytical balance (points will be deducted). Keep your work areas clean and neat. Cleaning assignments will be given by instructor each lab period. You are expected to stay focused on your experiment. Cell phone activity should be kept at a minimum and outside the lab.

Laboratory Schedule of Experiments

	Expt #							
Locker	1	2	3	4	5	6	7	8
1	Ca	BSA	Fe	Cu (ASV)	Ni (Grav)	AA	pH	Res. Proj.
2	Ca	Fe	Cu (ASV)	Ni (Grav)	AA	pH	BSA	Res. Proj.
3	Ca	Cu (ASV)	Ni (Grav)	AA	pH	BSA	Fe	Res. Proj.
4	Ca	Ni (Grav)	AA	pH	BSA	Fe	Cu (ASV)	Res. Proj.
5	Ca	AA	pH	BSA	Fe	Cu (ASV)	Ni (Grav)	Res. Proj.
6	Ca	pH	BSA	Fe	Cu (ASV)	Ni (Grav)	AA	Res. Proj.
7	Ca	BSA	Fe	Cu (ASV)	Ni (Grav)	AA	pH	Res. Proj.
8	Ca	Fe	Cu (ASV)	Ni (Grav)	AA	pH	BSA	Res. Proj.
9	Ca	Cu (ASV)	Ni (Grav)	AA	pH	BSA	Fe	Res. Proj.
10	Ca	Ni (Grav)	AA	pH	BSA	Fe	Cu (ASV)	Res. Proj.
11	Ca	AA	pH	BSA	Fe	Cu (ASV)	Ni (Grav)	Res. Proj.
12	Ca	pH	BSA	Fe	Cu (ASV)	Ni (Grav)	AA	Res. Proj.
13	Ca	BSA	Fe	Cu (ASV)	Ni (Grav)	AA	pH	Res. Proj.
14	Ca	Fe	Cu (ASV)	Ni (Grav)	AA	pH	BSA	Res. Proj.
15	Ca	Cu (ASV)	Ni (Grav)	AA	pH	BSA	Fe	Res. Proj.
16	Ca	Ni (Grav)	AA	pH	BSA	Fe	Cu (ASV)	Res. Proj.
17	Ca	AA	pH	BSA	Fe	Cu (ASV)	Ni (Grav)	Res. Proj.
18	Ca	pH	BSA	Fe	Cu (ASV)	Ni (Grav)	AA	Res. Proj.

Collaborative Experiment:

For both of the copper experiments (AA and ASV) you will be paired with another student. During the first experiment, one student will be the manager and one the assistant. The manager will oversee the assistant's work and will report on the experimental success of this student in his/her own report and laboratory notebook. On the next experiment, the assistant will become the manager and do the same. This collaborative exercise will help students in gaining valuable laboratory management practices. For once, you will be the instructor!

The objective is for you to critique the quality of other students work. Be professional and critical and a simple half-page narrative will suffice. Include in your narrative the following: the student's laboratory technique, attention to detail, following of safety rules and overall performance.

Point Distributions for Grades**Lecture:**

Mid-term exams (2 @ 100 points each)	200 points
Final exam	250 points
Total	450 points

Laboratory:

Unknown samples (7 @ 35 points each)	245 points
Formal report (2 @ 25 points each)	50 points
Research project	50 points
Lab book (25 pts 1 st grading, 30 pts 2 nd grading)	55 points
Quizzes	70 points
Homework	80 points
Total	550 points

Total points for course**1000 points**

Grades will be assigned as traditional (A, B, C, D, & F) and based on points accumulated. However, class attendance, distribution of points and individual performance will be taken into consideration on final grades. To pass this course, students must complete all laboratory work. Students will receive an (F) if laboratory work is not completed (unless a valid, documented excuse is provided).

Dropping the course/incompletes

Hopefully, a student will not drop this course. However, in the event that this is necessary, the student must meet all university rules and deadlines. In addition, the student must check out of the laboratory at the time he/she drops the course and during the normal lab period. Lockers not properly checked out will result in the student being charged a \$10 fee in addition to broken or missing equipment.

An incomplete grade (I) will only be given to a student earning a "C" in the course with a valid, documented reason why the course cannot be completed during the term (an illness or serious accident). An INCOMPLETE GRADE REPORT form must be completed and given to the instructor by the end of the final examination week.

Final Comments

This is a challenging course and requires a good deal of time for laboratory preparation and lecture problem solving. Keep up with all lectures and homework and follow all laboratory experiments closely (flow chart will help you). If you have questions, ask. Finally, relax and enjoy the course.

Formal Report Sections – Detailed Description**Abstract**

A summary of the technique and contains key results. No background material should be included here.

Introduction

Here one states the aim, the historical and theoretical context of the work. Include any relevant chemical equations or reactions. Should be concise, but have enough information for a complete introduction. It is important to describe the chemistry (chemical equations) as well as the mathematical equations and formulas that will be used. Showing molecular structures is recommended whenever appropriate.

Experimental Procedures

This section is used for describing experimental procedures, conditions, apparatus and reagents used in the experiment. Do not use outline form. Paraphrase the instructions in the manual in your own words.

Data

The raw data obtained in the experimental section is presented here.

Analysis and Results

The data listed in the data section is analyzed by calculations or graphs in this section. Final results are tabulated for easy perusal. Show all calculations carried out including mean and standard deviation.

Conclusion

This section contains a critical evaluation of the data gathered and the errors inherent in them. Be specific and thorough in your narrative.

References

Throughout the body of the manuscript, statements used which derive from external sources require defense based on previous work. These statements must be denoted numerically either with a superscript or in parenthesis in the text, and then the source listed in the Reference section by that number.

Example:
