NATS information session for undeclared majors in nursing

Information session for all undeclared majors

Executive Committee Meeting

STEMEC hosts Natural Science Transfer Orientation in Summer 2018

Natural Science information session for undeclared majors in nursing

March 8th, 2018

Our Consortium started off the new semester with a few information sessions for students new to the university and Natural Science major. Starting with an information session for post-baccalaureate nursing students who need a Bachelors of Science degree in order attend their nursing school of choice We helped many students who were interested in the Natural Science major to complete that goal for their nursing career.

Information session for all undeclared majors

March 15th, 2018

Our center also brought together an information session helping those who are new to the university by introducing the Natural Science major. Natural Science is an interdisciplinary science major, focusing in science fields in biology, chemistry, geoscience and physics. Because the Bachelor of Science degree in Natural Science provides broad training across several science disciplines, career opportunities for persons with the degree span a wide range. Visit the Natural Science homepage at Cal State LA for more information on the major.

STEMEC hosts Executive Committee Meeting at Cal State LA

May 4th, 2018

Our Consortium personnel joined together to have an executive committee meeting with staff and faculty. Topics of discussion were Institutional Review data as well as evaluation for our project. We are proud to have the Consortium staff and faculty help advise students about their STEM degree and goals in a STEM field. Each campus brings something new to our students, and we all work together to help them achieve their goals in science.

STEMEC hosts Natural Science Transfer Orientation in the Summer

Summer 2018

Summer is coming as well as new transfers from campuses all over southern California. Through the grant we are able to partner with neighboring campuses to bring new students to our program. Natural Science is a growing major, with over 160 students currently! We started at only around 60 at 2015, and have grown with more than double the student count. If you are interested in an interdisciplinary science degree with a broad range of career opportunities, come see us and our Advisement Coordinator to talk about the program.
